

APL Borealis is pleased to present...

"The Spring 2015 APL+RoundUp!"

A focused Workshop demonstrating recent APL+Win features
and integration with leading technologies

Downtown Toronto - Friday, June 19th - lunch included*

Location: Learning Tree Intl., 1 Dundas Street W., 10th Floor, Toronto (Yonge & Dundas)
Date/Time: Friday, June 19th, 9:00am to 4:30pm
Cost: **FREE!** (for APL Borealis subscribers, and at \$199, a heck of a deal otherwise!
or, a refundable payment on your next purchase - see below*)

APL+Win excels as a high productivity development platform for business applications in the Windows environment. In the past several years, the APL2000 Team has released a number of key features that can enhance your APL systems in several ways. But we know the learning curve is steep, so in this intensive part-day workshop, we will explore these new items and discuss how they can be used now to bring your legacy APL applications into the modern world, or, help you develop state-of-the-art IT solutions with a product you already know (and love!).

AGENDA:

➤ Morning One-on-One Sessions - 9:00am to 12-noon: *bring your questions!*

From 9:00 to 12:00AM - workshop attendees are invited to come for a brief one-on-one consultation session with APL Borealis (duration/availability depends on demand) - we can cover any topics you wish, refresh your APL skills, discuss your system issues, etc. - **must be booked in advance**

Lunch 12-noon to 1:00PM

➤ Afternoon Workshop Topics - 1:00pm to 4:30pm, will include:

- **[J]CSE** - interface to C#, .Net application development - vast potential of the entire .Net library
- **LC.Charts** - an excellent new, no-cost charting interface for APL for custom business graphics
- **the APL2000 Web Forum** - let's examine some of the gems in this great online collection
- **WebServices** - distribute your APL app via the web, internally or worldwide
- **WPF** - a brief look at integration of WPF GUI techniques and APL
- **XML** - how to integrate APL with xml-based systems
- **APL & Excel** - we will revisit this old chestnut and show how it still shines
- APL and popular software libraries (eg. **R**) - seamless integration
- **Data I/O** best practices - a roundup on how best to get data in/out of your APL systems
- further suggested topics are welcome! (if time permits)

***** RSVP: is essential *****

Space is limited - please contact us to register for this event as soon as possible.

RSVP or Further Info: Richard Procter, APL Borealis, tel: 1-866-888-6377
